Request for Corrected Patent Application Publication
Serial No. 10/015,314

Dear Mr. Lachel:

I am following up on our June 20, 2003 telephone conversation about the above application.

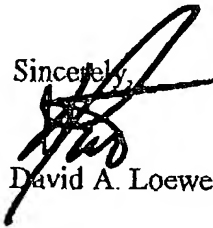

As I mentioned, the drawing on the cover page and the first drawing of the published application are not related to my application. They should be replaced with Figures 1 and 2 of my application, which are missing and have not been published. I have attached a copy of the first two pages of the published application that I printed from the PTO web site and, for comparison, Figures 1 and 2 that were submitted with the application. As you can see, the published figures are not related to my invention.

I believe this error is material because a viewer of my application who sees the first page, or the second, will not appreciate what my invention is, which will undermine the purpose of the publication process.

If you have any other questions, please let me know. My contact information is set out in the margin.

Thank you for your attention.

Sincerely,

David A. Loewenstein

ABSTRACT

This invention is for an innovative multi-handed poker game where cards are arranged as a polygon, where each side has the same number of cards and each side has corner cards that are shared with adjacent hands. The player can exchange cards from one hand with cards in another hand to improve his odds of winning.
